

Q3/17 Quarterly Report

K+S GROUP

- + Sharp rise in operating earnings before depreciation and amortisation (EBITDA)
- + Adjusted free cash flow up significantly year-on-year due to lower capital expenditure
- + Revenues and sales volumes in the Potash and Magnesium Products business unit boosted by higher product availability at the integrated Werra plant
- + Salt business in North America impacted by Hurricane Irma

- + Initial deliveries made to customers from the Bethune plant
- + Approval received for early commencement of expansion of tailings pile capacity in Hattorf

- + Outlook full year 2017: EBIT I of € 260–360 million reiterated
- + Corporate strategy ‘Shaping 2030’ presented: Transformation phase with focus on halving the leverage and return to investment grade rating, subsequent growth phase with ambitious development goals

¹ The adjusted key indicators include the profit/(loss) from operating anticipatory hedges in the relevant reporting period, which eliminates effects from changes in the fair value of the hedges as well as effects from the exchange rate hedging of future capital expenditure in Canadian dollars (Bethune plant). Related effects on deferred and cash taxes are also eliminated; tax rate in Q3/17: 29.6% (Q3/16: 29.0%).

² Concerns cash investments as well as depreciation of property, plant and equipment and amortisation of intangible assets, taking claims for reimbursement from claim management into account.

³ Adjusted for purchases/sales of securities and other financial investments.

⁴ LTM = last twelve months.

⁵ FTE: Full-time equivalents; part-time positions are weighted in accordance with their respective share of working hours.

Rounding differences may arise in the percentages and numbers shown in this Quarterly Report.

RESULTS OF OPERATIONS, FINANCIAL POSITION AND NET ASSETS

RESULTS OF OPERATIONS

- + In the quarter under review, K+S GROUP revenues rose from € 687.6 million in the previous year to € 726.5 million, an increase of around 6%.
- + Enhanced product availability, especially of fertilizer specialties, along with higher average prices for potash and magnesium products had a positive effect on revenue growth. The unfavourable development of exchange rates in both business units and lower sales volumes in the North American de-icing salt business had an offsetting effect.
- + Operating earnings before depreciation and amortisation (EBITDA) climbed 37% in the quarter under review, rising at a faster rate than revenues; this was mainly due to the significantly higher product availability of fertilizer specialties.
- + Operating earnings EBIT I came to € 12.3 million in the third quarter, up from € – 31.4 million in the prior-year period. The adjustment of the plants' useful lives performed on 1 July 2017 reduced depreciation and amortisation by over € 25 million in the quarter under review.
- + Adjusted earnings after tax amounted to € 1.5 million (Q3/16: € – 27.4 million), giving earnings per share of € 0.01 (Q3/16: € – 0.14).

FINANCIAL POSITION

CAPITAL EXPENDITURE						
	Q3/16	Q3/17	%	9M/16	9M/17	%
in € million						
Potash and Magnesium Products business unit	224.4	128.1	– 42.9	825.5	491.3	– 40.5
Salt business unit	33.9	27.2	– 19.8	71.9	71.4	– 0.7
Complementary Activities	1.5	0.9	– 42.1	3.4	1.9	– 45.1
Reconciliation	1.4	1.3	– 8.3	2.9	3.2	+ 9.9
K+S Group	261.2	157.5	– 39.7	903.7	567.8	– 37.2

- + Net cash flows from operating activities remained virtually unchanged at € 382.5 million in the first nine months compared with € 390.3 million in the previous year. Here, lower tax payments were offset by higher working capital commitments.
- + Net cash flows used in investing activities (after adjusting for purchases/sales of securities and other financial investments) improved to € – 623.3 million (9M/16: € – 846.6 million), an increase primarily resulting from the scheduled decrease in capital expenditure for the Bethune plant.
- + The adjusted free cash flow was therefore still negative, but improved significantly to € – 240.8 million (9M/16: € – 456.3 million).
- + Net cash flows from financing activities at the reporting date stood at € 373.9 million, contrasting with € 457.9 million in the previous year. The decline was attributable to higher repayments of current financial liabilities.

- + As of 30 September 2017, net cash and cash equivalents amounted to € 271.9 million (31 December 2016: € 134.7 million; 30 September 2016: € 129.8 million).

OVERVIEW OF CASH FLOWS		
	9M/16	9M/17
in € million		
Net cash flows from operating activities	390.3	382.5
Net cash flows from/(used in) investing activities	– 834.9	– 607.9
Free cash flow	– 444.6	– 225.4
Adjustment for purchases/sales of securities and other financial investments	– 11.7	– 15.4
Adjusted free cash flow	– 456.3	– 240.8

NET ASSETS

- + The net debt of the K+S GROUP at the reporting date was € 3,939.2 million (31 December 2016: € 3,583.8 million; 30 September 2016: € 3,179.5 million). The increase compared with the prior-year reporting date was mainly attributable to the negative free cash flow.

+ Consequently, net financial liabilities excluding provisions rose to € 2,780.0 million at the reporting date (31 December 2016: € 2,401.1 million, €; 30 September 2016: € 2,052.1 million). This was due in part to the issuance of a further corporate bond.

Operating earnings (EBIT I)	- 48.9	1.7	-	68.1	75.0	+ 10.1

REVENUES AND EARNINGS UP

- + Revenues of the Potash and Magnesium Products business unit increased to € 357.7 million in the quarter under review, mainly on the strength of higher fertilizer prices and rising overall sales volumes.
- + Due to stabilisation of the disposal of saline wastewater from production at the Werra plant, a significant recovery in sales of high-margin products such as potassium sulphate (SOP) was recorded. This was also supported by higher sales volumes of Korn-Kali in Germany and Poland.
- + Mainly as a consequence of this, sales volumes in the quarter under review at 1.41 million tonnes were significantly higher than the figure for the previous year (Q3/16: 1.26 million tonnes). Sales volumes of potassium chloride (MOP) increased by 2% to 0.67 million tonnes, while sales of fertilizer specialties rose by more than 25% to 0.56 million tonnes. Industrial products recorded 13% growth in sales volumes to 0.18 million tonnes.

VARIANCE COMPARED WITH PREVIOUS YEAR

	Q3/17	9M/17
in %		
Change in revenues	+ 18.6	+ 7.5
- volume/structure-related	+ 12.8	+ 8.1
- price/pricing-related	+ 5.9	- 1.6
- currency-related	- 2.1	+ 0.1
- consolidation-related	+ 2.0	+ 0.9

- + We adjusted the ramp-up curve at the Bethune plant in the third quarter. Instead of the originally intended production volume of 600,000 to 700,000 tonnes, we now expect an annual production of around 500,000 tonnes. At the same time, we commenced depreciation and amortisation later.
- + While prices for the standard potassium chloride product rose further, especially overseas, higher product availability in the market led to a dip in average prices of SOP.

- + Operating earnings before depreciation and amortisation (EBITDA) surged to € 42.4 million (Q3/16: € 5.2 million) in the third quarter. Here, the improvement in operations at the integrated Werra plant continued to be offset by the costs for the start of production at the Bethune plant.
- + As a result of the above-mentioned effects, EBIT I in the reporting period amounted to € 1.7 million (Q3/16: € – 48.9 million).

MEASURES TO REDUCE SALINE WASTEWATER ACCORDING TO PLAN

- + Disposal of saline wastewater from production is important for the continuation of production at the Werra plant. We are therefore investing in multiple measures for the disposal of wastewater. As a consequence of our efforts, there were no disposal-related production stoppages in the third quarter.
- + From 2018 onwards positive effects on the disposal situation are expected as a result of the commissioning of the new kainite crystallisation and flotation facility (KCF), which will reduce the volumes of saline wastewater at the Werra plant by around 20%.
- + For temporary wastewater disposal, we implemented additional measures that alongside the storage of brine in the Springen mining field include the discharging of water into the inactive K+S Bergmannsseggen-Hugo mine (Hanover region) and the transport of saline water to Bernburg (Saxony-Anhalt). In addition, production on site was further stabilised by expanding the basin capacities to a total of 530,000 m³.

EARLY COMMENCEMENT OF EXPANSION OF TAILINGS PILE CAPACITY AT THE HATTORF SITE APPROVED

- + Positive developments can now be reported concerning the approval process for the expansion of tailings pile capacity at the Hattorf site, which started in 2011. Based on the concept, which has been enhanced further to reduce the environmental impact, the licensing authorities have now issued a positive overall forecast of the approvability of the expansion of tailings piles. Accordingly, our application for 'early commencement' was approved on 9 November 2017.

K+S BEGINS SETTLEMENT NEGOTIATIONS WITH THE MUNICIPALITY OF GERSTUNGEN AND BUND

- + To resolve long-running disputes, K+S is currently holding settlement talks with the municipality of Gerstungen. These centre on ensuring the long-term safety of the municipality's drinking water supply and ending the legal disputes at the same time.
- + In addition, following successful exploratory discussions, K+S and Federation for Environment and Nature Conservation Germany (Bund für Umwelt und

Naturschutz Deutschland e. V., BUND) have agreed to open settlement negotiations.

- + The objective is to end the legal dispute over the injection permit. This is expected to provide legal certainty for the permit applicable until 2021 that is required under water law to reduce saline wastewater volumes at the Werra plant.

INITIAL POTASH DELIVERIES FROM BETHUNE ON THE WAY TO CUSTOMERS

- + On 27 September 2017, the first large rail shipment with a total of 122 wagons from the Bethune potash mine (Saskatchewan) reached K+S's loading and storage facility in Port Moody, Vancouver.
- + On 24 October, the first ship carrying 30,000 tonnes of potash fertiliser departed the transshipment facility in the Pacific port of Vancouver.
- + The production volume for 2017 is estimated at around 500,000 tonnes.

Operating earnings (EBIT I)	18.4	16.8	- 8.7	145.8	123.1	- 15.6

REVENUES DOWN MODERATELY ON PREVIOUS YEAR

- + Revenues for the Salt business unit in the quarter under review were down moderately on the figure for the previous year, mainly due to unfavourable currency translation and lower prices in the North American de-icing salt business.
- + In North America, the early fills business was below average on account of high inventories in our customers' stores resulting from a mild winter in 2016/2017; improved demand in Europe partly compensated for this performance in terms of volumes.
- + Revenues from salt for consumer products, food processing, industrial salt and salt for chemical use together recorded a slight decrease compared with the prior-year quarter. Higher sales volumes in the salt for chemical use segment were offset by lower volumes of high-priced consumer products, which led to a decline in average revenue.

EARNINGS IMPACTED BY HURRICANE IRMA

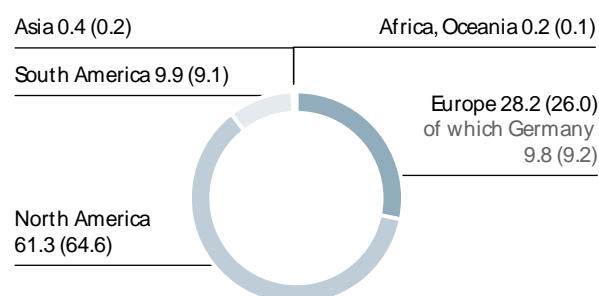

- + Operating earnings before depreciation and amortisation (EBITDA) were impacted by the effects described as well as by the repercussions of Hurricane Irma, which primarily led to production stoppages, a lack of transport capacity and higher costs at the Inagua (Bahamas) site.

- + The adjustment of the plants' useful lives performed on 1 July 2017 significantly reduced depreciation and amortisation in the quarter under review. Overall, operating earnings EBIT I were therefore down only moderately on the prior-year figure.

REPORT ON RISKS AND OPPORTUNITIES

Please see the relevant comments in our 2016 Annual Report from page 59 onwards and from page 99 onwards for a detailed description of the system for the management of risks and opportunities as well as potential risks and opportunities.

The risk described on page 107 of the 2016 Annual Report regarding the refusal or revocation by a court of official permits for the disposal of solid production residues remains within the probability of risk between 10% and 50%. Positive developments can now be reported concerning the approval process for the expansion of tailings pile capacity at the Hattorf site, which started in 2011. Based on the concept, which has been enhanced further to reduce the environmental impact, the licensing authorities have now, however, issued a positive overall forecast as regards the approvability of the expansion of tailings piles. Accordingly, our application for “early commencement” was approved on 09 November 2017. We are therefore confident of being able to complete the approval process such that this has no negative effects on production. Moreover, the approval process for the expansion of tailings pile capacity at the Zielitz and Wintershall sites is on schedule.

The risks to which the K+S GROUP is exposed, both in isolation or in interaction with other risks, are limited and do not, according to current estimates, jeopardise the continued existence of the Company. There is no offsetting of opportunities and risks or their positive and negative changes against each other.

OUTLOOK 2017

- + Our assessment for full-year 2017 is unchanged on the forecast in the 2017 Half-Yearly Financial Report.
- + Potash and Magnesium Products business unit
 - + After our average price in the first nine months of 2017 increased compared with full-year 2016 (FY/16: € 253/t; 9M/17: €255/t), we are reiterating our assumption that average prices for potash and magnesium products for 2017 will be slightly higher. Market prices for potassium chloride are continuing to recover and enhanced product availability of potassium sulphate is currently reflected in an upturn in demand. There are signs that prices here are stabilising as a result. The prices for our high-purity industrial potash are probably still a reflection of the positive trend in potassium chloride.
 - + A hydrological normal year and the supportive effect of our alternative waste disposal measures for improving the production capabilities of the integrated Werra plant provide the basis for our full-year guidance. As a result, we do not expect any more production stoppages for the remainder of the year.
 - + For the year as a whole, we estimate a tangibly higher sales volume than in the previous year of now 6.8 – 7.0 million tonnes (2016: 6.06 million tonnes).
- + Salt business unit
 - Our outlook assumes that the de-icing salt business will see a winter that is within the long-term meteorological average. According to this forecast, increases in volumes in the European de-icing salt business in particular are then likely to lead to a moderate increase in overall sales volumes compared with the mild previous year (2016: 10.1 million tonnes). Sales of salts that are not used for road safety, which are rising at the same rate (2016: 9.3 million tonnes), may push up our total volumes in the Salt business unit by a moderate amount (2016: 19.4 million tonnes).

+ K+S Group

- + The upper end of the ranges reflects, among other things, the chance that the winter will be above the long-term meteorological average, which would result in a higher contribution to earnings from the de-icing salt business.
 - + The lower end of the ranges reflects the risk of a milder winter. Furthermore, this includes possible provisions resulting from an early decision to shut down the Sigmundshall plant. Due to the fact that the decision-making process is still ongoing, a final decision has yet to be made.
- + In light of this situation, we are sticking to the expanded range and continue to anticipate EBITDA between € 560 and € 660 million and EBIT I in the range of € 260–360 million for full-year 2017 (2016: € 519 million and € 229 million, respectively).

Potash and Magnesium Products business unit						
Sales volumes	million tonnes	6.1	significant increase	significant increase	6.8 – 7.2	6.8 – 7.0
Salt business unit						
Sales volumes – solid salt	million tonnes	19.4	moderate increase	moderate increase	moderate increase	moderate increase
– of which consumer products, food processing, industrial salt and salt for chemical use	million tonnes	9.26	moderate increase	moderate increase	moderate increase	moderate increase

¹ The adjusted key indicators include the profit/(loss) from operating anticipatory hedges in the relevant reporting period, which eliminates effects from changes in the fair value of the hedges as well as effects from the exchange rate hedging of future capital expenditure in Canadian dollars (Bethune plant). Related effects on deferred and cash taxes are also eliminated; tax rate in Q3/17: 29.6% (Q3/16: 29.0%).

² Concerns cash investments as well as depreciation of property, plant and equipment and amortisation of intangible assets, taking claims for reimbursement from claim management into account.

UPDATE ON 'SHAPING 2030'

- + Our new Group strategy is putting us on a robust, sustainable growth course.
- + The core of this strategy is a market- and customer-driven positioning by focusing on the four product market segments of agriculture, industry, consumers and communities.
- + Transformation phase up to 2020: leveraging of synergies that will increase earnings by at least € 150 million per year from the end of 2020; positive free cash flow from 2019; reduction of net debt/EBITDA by half by 2020. We hope to fulfil the requirements for an investment grade rating again in 2023.
- + For the subsequent growth phase up to 2030, we have developed a strategic roadmap with development goals and strong growth options.
- + Strategy implementation commenced: the focus in recent weeks has been on setting up internal project management, preparing the re-organisation and taking the first steps for validating the desired synergies.
- + We will have developed the cornerstones of the future organisation by the end of the year. The processes and structures will be fleshed out further in the course of 2018 and progressive implementation will begin.

RESPONSIBILITY STATEMENT FROM THE LEGAL REPRESENTATIVES OF K+S AKTIENGESELLSCHAFT

To the best of our knowledge, and in accordance with the applicable accounting principles for interim reporting, the interim consolidated financial statements give a true and fair view of the assets, liabilities, financial position and profit or loss of the Group, and the interim Group management report includes a fair review of the development and performance of the business and the position of the Group, together with a description of the material opportunities and risks associated with the expected development of the Group.

Kassel, 10 November 2017
K+S Aktiengesellschaft
Board of Executive Directors

FORWARD-LOOKING STATEMENTS

This Quarterly Report contains facts and forecasts that relate to the future development of the K+S Group and its companies. The forecasts are estimates that we have made on the basis of all the information available to us at this time. Should the assumptions underlying these forecasts prove incorrect or should certain risks – such as those referred to in the Risk Report of the current Annual Report – materialise, actual developments and results may deviate from current expectations. The Company assumes no obligation to update the statements contained in this Quarterly Report, save for the making of such disclosures as required by law.
